Business Verifications

With connections to **more than 6,500 authoritative sources through a single API**, Evident is the only solution that enables secure and comprehensive business verifications without the risk and liability of holding personal information.

By verifying business credentials, legal registrations, judgments, and other key data points, Evident's Identity Assurance Platform helps organizations of all sizes and industries know with confidence that they are dealing with a real business that's properly registered in their U.S. State(s) of operation.

Revolutionizing the way personal data is shared.

Simple
Start quickly, scale easily

Accurate
Data you can trust

Secure
No exposure to personal data

Compliant

How it Works

1. Customize

Configure your policy by selecting the types of business verification results you need (e.g. license status, watchlist hits, counts of bankruptcy cases, liens, judgments, etc.) and manage your requests all through a single API.

2. Request

With simple document uploads and minimal data entry, initiate your business verification request with less friction and frustration.

3. Verify

Automatically verify businesses with the most authoritative data pulled directly from more than 6,500 authoritative sources.

Fast Facts

6,500+ AUTHORITATIVE **SOURCES**

12,500+ DATA **ATTRIBUTES**

125M VERIFIABLE **BUSINESSES**

TECHNOLOGY & SCALE

TECHNOLOGY

Evident leverages **artificial intelligence technologies like machine learning, computer vision, and facial recognition** to streamline vendor onboarding, minimize attrition, and facilitate comprehensive business verifications with the highest degree of accuracy.

Evident's unique distributed data model, protected with end-to-end cryptography, gives companies the option to access as much or as little verified information as they need, virtually eliminating their risk of handling sensitive personal data.

SCALE

With a **growing library of more than 12,500 data attributes,** Evident can verify anything from government-issued IDs, criminal history, and insurance to professional licenses, education, and more. Evident has **four primary integration methods**, making it flexible, scalable, and capable of adapting to an organization's new business needs as they grow or pivot.

evident

Enabling companies of all industries and sizes to verify businesses quickly, securely, and confidently… that's the power of Evident.
